

St Vincent's Clinic

# INFORMATION FOR REFERRING DOCTORS

Over 30 Healthcare Specialties

2024/25

# St Vincent's Clinic at a Glance

**340+**  
Specialists

Multidisciplinary centre of excellence with over **340 accredited doctors** in more than **30 specialties**

**30+**  
Years

**Pioneering healthcare facility** in Australia

**4,000**  
Visits

Around **4,000 patients** and carers visit daily

**Compassionate Care**

Open Support's **community programs** support the marginalised and vulnerable

**470**  
Grants

Advancing **clinical research** through SVCRF grants program

**Teaching the Next Generation**

Sharing clinical expertise through **medical education**

## Our Mission

As a Catholic organisation our Mission is to bring God's love to those in need. St Vincent's Clinic serves people in need by joining multidisciplinary health care, compassionate community services, teaching and research. To further our impact on the community, St Vincent's Clinic has two charitable arms: our research and education foundation, St Vincent's Clinic Research Foundation, and our community services organisation, Open Support.

Operating within the ethical framework of Mary Aikenhead Ministries and the mission and values of St Vincent's Health Australia, all at St Vincent's Clinic are committed to providing care and services of the highest standard and to the pursuit of excellence.

We Acknowledge the Traditional Owners of this country, including the Gadigal people of the Eora nation - whose lands on which St Vincent's Clinic is built, and recognise their continuing connection to land, waters, and culture. We pay our respects to their Elders past, present, and emerging.

# St Vincent's Private Hospital Sydney

*Caring for your community*

St Vincent's Private Hospital Sydney has a long-standing history and strong values that underpin our commitment to patient-centred care.

## OUR VALUES

**Compassion:** We respect all with the same care and kindness, whether patients or staff, always striving to assist with their health and wellbeing

**Justice:** We are open to all people who need our care and our time, and believe that everyone has the right to the best healthcare without discrimination

**Excellence:** We engage in best practice keeping abreast with the latest innovations in healthcare through regular research and teaching

**Integrity:** We always act with integrity, we value each other, our decisions are always ethically based, and we take seriously our responsibility to be stewards of our human resources and environment

For the latest news and updates about our services and specialists visit our website

*Inspired  
by You*

**ST VINCENT'S  
PRIVATE HOSPITAL**  
SYDNEY

CONDUCTED BY THE SISTERS OF CHARITY OF AUSTRALIA

# Anaesthesia

**The Department of Anaesthesia provides a comprehensive service to St Vincents Private Hospital, as well as the the Day Surgery and Endoscopy Units that are located in St Vincent's Clinic. They also supply anaesthetic services to patients in other clinical areas as required.**

The St Vincent's Private Hospital Department of Anaesthesia is the oldest private hospital Department of Anaesthesia in Australia. Currently there are more than 80 anaesthetists accredited across the St Vincent's Private campus. The Department has a long history of excellence in Anaesthesia and provides regular continuing education and quality assurance for their members.

In addition to providing a comprehensive range of highly skilled anaesthetic services appropriate to all surgical craft groups and procedures, members of the Department also provide preoperative medical care, an acute pain referral service and an after hours critical response capability.

Generally the surgeon will select an anaesthetist best able to provide the individual service that the patient

will require for their procedure. If you or the patient would like to have any input into this decision, your queries are best directed to the surgeon's rooms.

In complex scenarios, the anaesthetist will contact the patient prior to the procedure but all would be happy to speak to you or the patient at your convenience as required. Once again, if you or the patient require to speak with your anaesthetist the best path would be to contact the surgeon's rooms with this request.

The following Anaesthetists have rooms within the clinic and can be contacted there at:

Suite 808  
Level 8  
St Vincent's Clinic  
Phone: 8382 6842  
Fax: 8382 6841

# Bone Densitometry

## St Vincent's Clinic Bone Densitometry offers the following services:

- DXA measurement of spine, proximal femurs, whole body, radius
  - Spine and both femurs are routinely measured
  - Other sites as requested or if spine and femur not reliable
- Trabecular bone score to assess bone microarchitecture – routinely included
- Overall absolute fracture risk – routinely provided
- Lateral spine morphometry to assess vertebral fractures – if requested
- Whole body and regional composition – if requested

# Breast Cancer & Breast Surgery

## The Breast Surgery Department provides specialist care for patients with breast cancer and other breast disorders.

A full range of breast surgery techniques including breast conserving surgery, oncoplastic surgery, mastectomy, sentinel lymph node biopsy, and breast reconstruction are provided.

Surgeons in the department work closely with specialists in Medical Oncology, Radiation Oncology, Plastic and Reconstructive Surgery and Cancer

Genetics within the St Vincent's Campus to provide best-practice multidisciplinary care for patients with cancer.

Patients are seen in the Specialist's consulting rooms in St Vincent's Clinic. Surgery is performed in St Vincent's Public Hospital or St Vincent's Private Hospital on the St Vincent's Darlinghurst campus.

Our aim is to provide excellent care, from early diagnosis to ongoing management and follow up. All patients are presented at our regular multidisciplinary tumour group meetings held at the Kinghorn Cancer Centre to ensure that all their care is fully coordinated within the one centre of excellence.

# Cardiac Investigations & Echocardiography

**Cardiac Investigations and Echocardiography is a partnership practice located on Level 8, Suite 805 of St Vincent's Clinic.**

## Investigations provided include:

### 2D, 3D and 4D Echocardiographic Studies including:

- Transoesophageal Echocardiography
- Stress Echocardiography (treadmill & dobutamine)
- Mobile Echocardiography for inpatients
- Echocardiography with bubble study to exclude septal defects/patent foramen ovale
- Four echocardiogram machines, two stress echocardiography laboratories and 3D/4D equipment provide the latest technology available

### Electrocardiography including:

- 12-lead Electrocardiograms
- Stress Testing
- Holter Monitoring
- Event Monitors (Heartbug)
- Measurement of Late Potentials (SAECG)
- 24-hour ambulatory BP monitoring

Non-invasive cardiology tests are carried out under the supervision of Dr David Baron, Professor Michael Feneley AM, Dr Cathie Forster, Professor Chris Hayward, Dr Neil Jacobs, Professor Anne Keogh, A/Prof Eugene Kotlyar, Professor David Muller, A/Prof Mayoran Namasivayam, A/Prof Andrew Roy, Dr David Roy, A/Prof Rajesh Subbiah, Dr Camilla Wainwright and Dr Bruce Walker.

These thirteen cardiologists cover every discipline of Cardiology, and each is a leader in their field. They provide the largest and most comprehensive cardiac diagnostic service in the Eastern Suburbs.

The indications for stress echocardiography are similar to those for stress nuclear studies. Stress echocardiography has largely replaced stress ECG testing.

# Cardiology

## The Cardiology Department's specialists provide consultations and a full range of invasive and non-invasive diagnostic services.

### These services include:

- CT Coronary angiography
- Echocardiography, including transthoracic, transoesophageal and stress echocardiography
- Cardiac MRI (magnetic resonance imaging)
- Electrocardiography (ECG)
- Exercise and stress testing
- Ambulatory (Holter) monitoring
- Event recorders
- 24 hour BP ambulatory monitoring
- LA appendage occlusion devices
- Insertion of permanent pacemakers and implantable defibrillators
- Pacemaker testing
- Electrophysiological studies
- Transcatheter ablation
- Cardiac resynchronisation therapy
- Cardiac catheterisation
- Balloon angioplasty (PTCA)
- Coronary, carotid, renal and peripheral arterial stents
- Percutaneous aortic, mitral and tricuspid valve replacement; percutaneous mitral and tricuspid valve repair
- Percutaneous valvuloplasty procedures
- Percutaneous closure of atrial septal defects, patent foramen ovale and patent ductus arteriosus
- Right heart catheterisation with vasodilator challenge and exercise challenge
- Endomyocardial biopsy
- Advanced heart failure consultation – including transplantation and mechanical circulatory support device therapies
- Cardiac amyloidosis assessment and treatment
- Heart failure consultation
- Management of hypertension and coronary risk factors
- Pulmonary hypertension medical and surgical treatment
- Pulmonary hypertension and heart failure trial drug availability
- Renal denervation
- Atrial septostomy
- Pulse waveform analysis for hypertension
- Balloon Angioplasty for Chronic Thromboembolic Pulmonary Hypertension

The new Advanced Cardiac Imaging Centre offers dedicated CT coronary angiography and cardiac MRI scans using state-of-the-art equipment.

Sestamibi (persantin and exercise) and gated scans are provided by the Clinic's Nuclear Medicine Department.

The Cardiology Department is staffed by Fellows of the Cardiac Society of Australia and New Zealand and Fellows of the Royal Australasian College of Physicians, while many also belong to specialist colleges in the United States and Europe.

# Cardiothoracic Surgery

The St Vincent’s Campus enjoys an international reputation for its heart surgery, and the Hospital’s team of cardiothoracic surgeons have brought their skills to the Clinic.

A full range of adult cardiothoracic surgery is available on the campus. These services include:

- Pioneering robotic valve & coronary surgery
- Primary and revision coronary artery bypass grafting
- Conservative and replacement valvular surgery using both mechanical and biological prostheses. This is supported by a human homograft valve bank
- Minimally invasive coronary and valve surgery has been pioneered at the Hospital
- The largest single surgeon Minimally Invasive Mitral Valve Repair program in the country
- Extensive experience in beating heart surgery for Coronary Artery bypass grafting
- All forms of pulmonary surgery, including lung volume reduction surgery for emphysema
- Robotic and video assisted thoracic surgery
- Heart and lung transplantation for end-stage disease, as well as an active mechanical heart assist program

# Clinical Genetics & Genomics

**A clinical consultative service in Clinical Genetics and Genomics is provided, covering all aspects of Adult General and Specialty Genetics/Genomics as well as Familial Cancer.**

**Specialised services are readily available, including:**

- Genetic counselling
- Genetic assessment and diagnosis
- A wide range of diagnostic genetic and genomic testing tailored to individual patients
- Clinical interpretation of genetic/genomic test reports
- Family cascade testing and/or predictive testing of relatives
- Patient management advice and reproductive risk counselling/management for established genetic diagnoses/rare diseases
- Familial cancer risk assessment and management advice, cancer surveillance recommendations
- Reproductive carrier screening: counselling, testing, and/or management of increased-risk results
- Medicare-rebated genetic testing, pre- and post-test counselling and management advice

**Our areas of expertise, apart from General Genetics, include (alphabetical order, examples listed are not exclusive):**

- Cardiovascular genetics – familial cardiomyopathies and/or arrhythmias, familial hypercholesterolaemia, aortopathies/other vascular dissection and aneurysmal disorder
- Endocrine genetics - monogenic diabetes, young-onset endocrine tumours such as pheochromocytoma, paraganglioma, and familial pituitary tumours
- Familial cancer
- Immunogenomics – primary immunodeficiency disorders, autoinflammatory disorders
- Inherited retinal disorders
- Neurogenetics – hereditary ataxia syndromes, young-onset Parkinson Disease, early-onset dementia
- Pharmacogenomics - a genetic test predicting a person’s response to many TGA/FDA-listed medications, guiding the initial choice and dosing of a prescription medication
- Renal genetics – cystic kidney diseases, Alport syndrome, tubulointerstitial kidney disease, hereditary nephritis

# Clinical Haematology

**The Department of Haematology and Blood Stem Cell Transplantation provides a comprehensive service in diagnostic, therapeutic and consultative haematology.**

**The Areas of Expertise include:**

- Blood and Bone Marrow Transplantation (allogeneic & autologous): Our service is accredited to carry out transplants which we report to the Australian and New Zealand Transplant and Cellular Therapies (ANZTCT) Registry as well as internationally to the CIBMTR and the EBMT. We have expertise in performing complex allogeneic stem cell transplants, including related, unrelated and haploidentical donor transplants. We host the Australasian Bone Marrow Transplant Recipient Registry (ABMTRR) which collects data on all the Blood Stem Cell Transplants carried out in Australia and New Zealand. We run regular long-term survivorship clinics for our transplant patients, working collaboratively with you to manage the long-term sequelae of transplantation and preventative health strategies. We also perform autologous stem cell transplants for a variety of blood and autoimmune diseases, especially severe Scleroderma and Multiple Sclerosis. We are the NSW Health approved centre for transplantation for Scleroderma.
- Clinical Trials: We have an active clinical trials unit which conducts fundamental research into blood diseases, blood-related cancers and bone marrow transplants. It gives our patients the opportunity to participate in some of the latest therapeutic advances.
- Research: We conduct fundamental clinical and laboratory research into a variety of blood diseases including the fields of blood cancer, bone marrow transplant and thrombosis / haemostasis, and

autoimmune disease. Recent highlights include the study of stem cell transplantation to treat severe autoimmune disease, the molecular markers of leukaemic cells and the role of genetic and coagulation testing for thromboembolism.

- HIV/AIDS-related cancers: We are the leading clinical centre in Australia for the treatment of haematologic malignancies associated with HIV infection and are a member of the AIDS Malignancy Consortium, collaborating with the Australian Kirby Institute, which conducts clinical trial research in this area.
- Apheresis service
- Thrombosis / Haemostasis including platelet disorders

**Services provided:**

- Management of all blood diseases, including malignant and non-malignant haematology
- Allogeneic and autologous stem cell transplant
- Apheresis Service
- Venesection Program
- Rural Haematology Service: We run clinics in both Griffith and Wagga Wagga in country NSW twice a month
- Patient Blood Management and advice on perioperative haematological care
- Management of HIV-related cancers and blood diseases
- Advice on interpretation of laboratory tests in haematology

# Clinical Microbiology & Infectious Diseases

## A comprehensive service is provided in diagnostic and therapeutic microbiology and infectious diseases.

### This service includes:

- Advice on appropriate diagnostic tests
- Interpretation of microbiology results
- Investigation and treatment of patients with suspected infection or infectious diseases
- Antibiotic advice and management
- Travel medicine

Members of the department have extensive experience in all facets of clinical microbiology and infectious diseases, including HIV medicine and infections in immunocompromised patients. Royal colleges and special societies to which members of the department belong include Royal Australian College

of Physicians, the Royal College of Pathologists of Australasia, the Australasian Society for Infectious Diseases, the Australian Society for Microbiology, the Australasian Society for HIV Medicine, the American Society of Microbiology, the Infectious Diseases Society of America, Transplant Infectious Diseases and the International Association of Therapeutic Drug Monitoring and Clinical Toxicology.

If Prof Deborah Marriott is unavailable, referrals for patients who reside in the St Vincent's catchment area may be faxed to the public hospital Infectious Disease Clinic on 8382 2090.

# Colorectal Surgery

**In addition to the spectrum of general surgical procedures, this Department offers a specialised service in all aspects of surgery of the colon, rectum and anus.**

**This service includes:**

- Day-only endoscopy and colonoscopy service
- Complete investigative services for rectal bleeding immediately available, together with the management of bowel polyps, including programmes for ongoing surveillance
- Laparoscopic colectomy for benign and malignant condition when indicated
- Special expertise in sphincter-saving procedures for cancer of the rectum including colo-anal anastomoses and abdomino-perineal pull-through procedures
- Total management of colon and rectal malignancy (only one in 20 patients now requires a permanent colostomy)
- Specialised treatment of diverticular disease and its complications, including bladder and vaginal fistulas, and also of ulcerative colitis and Crohn's disease, where total proctocolectomy and ileo-anal pouch procedures have dramatically improved the patient's quality of life

- Specialised service for complicated fistula in ano, cure of rectal prolapse, management of ano-rectal incontinence and management of rectal trauma
- A state-of-the-art Anal Physiology Laboratory including endorectal ultrasound to fully assess all aspects of faecal incontinence and sphincter impairments

The unit treats all aspects of anal disease, including haemorrhoids, fissure, hydradenitis, anal cancer and pilonidal sinus. Many of the minor anal problems are treated on a day-only basis utilising the Day Surgery Unit at St Vincent's Clinic.

# Diagnostic Endoscopy Centre

**The Diagnostic Endoscopy Centre (DEC) has been providing excellence in diagnostic and therapeutic endoscopy since 1990. It provides a comprehensive treatment for the diagnosis and treatment of gastrointestinal disease.**

The DEC's location within St Vincent's Clinic ensures access to St Vincent's Private and St Vincent's Public Hospital is available for supplementary care. Several DEC clinicians have public hospital appointments, ensuring high quality care is available to all patients.

The Diagnostic Endoscopy Centre has maintained three year accreditation with the Australian Council of Health Care Standards following an organisation-wide survey.

The centre has successfully negotiated contracts with the majority of health funds ensuring patients experience no or low out of pocket expenses for services received at the DEC.

Consultations are provided by each specialist in their individual rooms.

## **Tertiary referrals available on Campus:**

- Capsule endoscopy
- Endoscopic ultrasound
- Anorectal manometry
- Oesophageal pH monitoring
- Oesophageal motility
- Bravo pH monitoring
- Endoscopic Retrograde
- Cholangio-Pancreatography (ERCP)

## **Hours of Operation:**

Monday to Thursday: 7:00am – 7:00pm  
Friday: 7:00am – 6:00pm

[www.diagnosticendoscopy.com.au](http://www.diagnosticendoscopy.com.au)

## **Procedures performed:**

- Gastroscopy
- Colonoscopy
- Oesophageal dilatation
- Haemorrhoid therapy
- Barrett's oesophagus ablation

# Dietetics

**The Department of Dietetics and Nutrition encompasses all areas of nutrition, from prevention and treatment to management of a wide variety of diseases.**

Headed by Dr David Mann, the Department is also active in research into various areas of Dietetics and Nutrition. Current research includes studies into insulin resistance, glycaemic index and its relationship with obesity.

**Services include dietary advice on:**

- Diabetes
- Weight control including % fat measurements by skin fold calipers and % fat measurements by Bio-Impedance
- Serum lipid reduction and management
- Coeliac disease
- Gastrointestinal disorders including Irritable Bowel Syndrome, Diverticular disease, Crohn's disease, Ulcerative colitis, Liver disease
- Food allergies
- Gout
- Renal disease
- Sports performance including event preparation, and carbohydrate loading

It is a policy of the Department of Dietetics and Nutrition to maintain continuous communication and reporting to the referring medical officer.

Dr David Mann also provides nursing home, private hospital or home visits upon the medical officer's request.

These visits can be arranged directly with Dr Mann on 0411 388 663 or at [www.drdauidmann.com.au](http://www.drdauidmann.com.au)

In addition to the above services, the Department of Dietetics and Nutrition also assists in Policy and Procedure Manual formulation for accreditation of nursing homes and private hospitals.

# Endocrine (Thyroid, Parathyroid & Adrenal) Surgery

**The department of Surgical Oncology provides specialised care for patients with thyroid, parathyroid and adrenal disorders.**

Surgeons within the department hold appointments at St Vincent's Public and Private Hospitals. All the members of the department have undergone advanced post-fellowship training in endocrine surgery at prestigious overseas centres.

Consultations for both public and private patients are provided in our offices in St Vincent's Clinic.

Surgeons in the department work closely with specialists in Endocrinology, Medical Oncology,

Radiation Oncology, and Cancer Genetics within the St Vincent's campus to provide truly multidisciplinary care.

Our aim is to provide excellent care, from early diagnosis to ongoing management and follow up. All patients are presented at our regular multidisciplinary tumour group meetings held at the Kinghorn Cancer Centre to ensure that all their care is fully coordinated within the one centre of excellence.

# Endocrinology

**A clinical consultative service in endocrinology, diabetes, and metabolism is provided, covering all aspects of acute and chronic hormonal dysfunction.**

**Specialised tests are readily available, including:**

- Investigations of endocrine gland function through the comprehensive pathology services of the Clinic and Garvan Institute, where dynamic stimulation and suppression tests can be performed
- Bone mineral densitometry as well as thyroid and endocrine gland imaging through St Vincent's Clinic Medical Imaging & Nuclear Medicine

Areas of expertise, apart from general endocrinology and diabetes, include dysfunction and tumours of the thyroid, pituitary and adrenal glands, osteoporosis, obesity and polycystic ovarian syndrome.

# Geriatric Medicine

**The Geriatric Medicine Department provides clinical and diagnostic services for older people with 'geriatric syndromes' including dementia, depression, falls and frailty, mobility and continence problems.**

Older people with many co-existing medical problems necessitating multiple medications will receive a holistic review of the appropriateness of all their treatments, as well as advice on planning future care, options for staying at home or transitioning to residential care facilities, education and support for families and carers.

Areas of special interest and research include dementia and dementia care, rehabilitation, Parkinson's disease, falls and advance care planning. Access to coordinated, multidisciplinary outpatient and inpatient rehabilitation assessments can be facilitated.

Dr Elizabeth Harper is a Fellow of the Royal Australasian College of Physicians and member of the Australian and New Zealand Society for Geriatric Medicine. Her areas of special interest include:

- Cognitive Disorders
- Falls and Frailty Medicine
- Healthy Ageing
- Comprehensive Geriatric Assessments
- Peri-Operative Geriatric Assessments

## Hours of Operation:

Thursday: 1:00pm – 5:00pm

A/Prof Sandy Beveridge is a Fellow of the Royal Australasian College of Physicians and member of the Australian and New Zealand Society for Geriatric Medicine. His areas of special interest include:

- Falls and Frailty Assessment
- Perioperative Assessment
- Rehabilitation and Restorative Care
- Medication Management
- Cognitive Disorders

## Hours of Operation:

Friday: 1.00pm to 5.00pm

## Useful Link:

# Gynaecology & Obstetrics

**The Department of Gynaecology and Obstetrics at SVC offers a comprehensive range of gynaecological and obstetric services. The department sees and treats several thousand patients each year.**

All members of the department have been involved in ongoing education, research, training and teaching of fellow consultants, trainees, GPs and colleagues alike. No matter your chosen Specialist, you will receive totally attentive, caring, prompt and professional care and expertise.

All members of the department have extensive experience in their chosen areas.

## Services include management of:

- Menstrual dysfunction
- Endometriosis and other causes of chronic pelvic pain
- Vaginal Surgery including hysterectomy, prolapse and incontinence surgery
- Colposcopy and the management of the abnormal cervical screening
- Menopause management
- Pelvic tumours and gynaecological malignancy
- Infertility and endocrine disturbances
- Gynaecological problems in organ transplant patients
- Gynaecological emergencies including pain, haemorrhage and infection
- Reproductive Surgery

## Urogynaecology and Urodynamics

A substantial service is available in all aspects of Urogynaecology with full urodynamic facilities (Prof Bernard Haylen and A/Prof Joseph Lee). Assessment and management of all urogynaecological conditions such as stress incontinence, bladder overactivity, uterine and vaginal prolapse and voiding dysfunction is provided.

Botox for the female pelvic floor and pelvic floor ultrasound is also available.

Prof Haylen is the immediate past Chair, Standardization Steering Committee, International Continence Society (ICS) and Editor, ICS Glossary.

A/Prof Joseph Lee is currently on the Board of Examiners for the RANZCOG, and is the RANZCOG CU exam coordinator. He has been on numerous other international committees. A/Prof Lee is Journal reviewer for a number of national and international Medical Journals.

## Endogynaecology

The department of Gynaecology provides a number of extensively trained and experienced laparoscopic and hysteroscopic ("keyhole" or minimally invasive), surgeons, the majority having worked in the area since its inception or development. (Drs Jennifer Dew, Surya Krishnan, Vince Lamaro and A/Prof Joseph Lee). All surgeons have performed numerous procedures, and offer a range of advanced laparoscopic procedures including for endometriosis, pelvic pain, reproductive surgery, abnormal uterine bleeding, pelvic floor continence and prolapse surgery and pelvic tumours.

## Obstetrics

Dr Surya Krishnan provides a comprehensive obstetric service.

## Robotic Surgery

Both Dr Vince Lamaro and A/Prof Joseph Lee perform robotic surgery.

# Head & Neck

**The St Vincent's Head and Neck Service is one of the largest in Australia, offering a comprehensive consultative, diagnostic and therapeutic service that covers the whole spectrum of Head and Neck, including benign and malignant disease.**

The Head and Neck Service delivers world-class cancer care to all patients. All Head and Neck Surgeons at St Vincent's have completed Fellowships in Head and Neck Cancer Surgery.

### Head and Neck Cancer

The Head and Neck Service at St Vincent's has a national and international reputation for excellence. More than 350 cancer patients are seen annually at the Head & Neck Cancer.

The Multidisciplinary Team Meeting is held weekly at the St Vincent's-Kinghorn Cancer Centre. The team consists of a range of experts in Head and Neck cancer surgery, radiation oncology, medical oncology, reconstructive surgery, specialist radiology, pathology, dentistry, cancer nursing, dietetics, speech pathology, psychology and social work. The service is committed to translational research and is currently involved in research projects pursuing the benefits of genomic profiling and targeted immunotherapy for head and neck cancer patients.

### Robotic Surgery of the Head and Neck

St Vincent's, Sydney has one of the largest experiences in Australia in transoral robotic surgery (TORS).

It was the first unit in NSW to perform transoral robotic surgery and therefore is the most experienced unit in NSW.

We are here to support our patients and provide them with all the information required to make an informed decision about treatment and care.

### Areas of Expertise include:

- Oral cavity (mouth)
- Oropharynx (tonsil, tongue base, soft palate)
- Larynx
- Hypopharynx
- Cervical oesophagus
- Nasopharynx
- Nasal cavity and sinuses
- Cancer of unknown primary head and neck
- Thyroid and parathyroid tumours
- Trachea
- Subglottic stenosis
- Skull base tumours
- Paragangliomas
- Skin cancer of the head and neck
- Sarcomas of the head and neck

### Referrals:

You will need a referral from your GP, Medical Practitioner, Dentist or Dental Specialist.

Please bring all relevant pathology and radiology images and results that your referrer has arranged for you to your appointment.

# Health Assessment Centre

**The Health Assessment Centre, owned and operated by Executive Health Solutions (EHS), is located on Level 4 of the Clinic. The centre provides a number of health assessment and health management programs.**

The centre offers programs to both the corporate sector (delivered by EHS) and to the general public (delivered by Life First). All health assessments involve a head to toe analysis aimed at identifying health risks before they become problematic. Patients spend significant time with Exercise Physiologists and Doctors discussing their results and recommendations about how best to improve their health status.

Each of the EHS or Life First health programmes are designed to identify any health risks through a comprehensive medical and lifestyle appraisal.

Our experienced medical teams are experts in delivering the preventative and diagnostic examinations that detect early signs of disease and emphasise healthy lifestyles, risk factor management and personal behaviour change. Once health risks are identified, our targeted intervention programmes assist individuals to make changes to their lifestyle that result in improved health, productivity and quality of life.

The assessment process takes anywhere between 2-4 hours depending on the depth of medical analysis and imaging. Approximately 70% of diseases can be modified or prevented by lifestyle changes, including 50% of heart disease, stroke and diabetes and one third of cancers.

During the assessment, a full medical examination is performed including family and medical history, exercise stress/ECG to assess cardiovascular fitness, full lifestyle review and counselling and extensive pathology including liver function, cholesterol and blood sugar. Any urgent medical issues are immediately referred to the appropriate specialist from a large network of physicians.

However, patients are recommended to see a regular General Practitioner.

At the end of the assessment, patients have time with the Doctor to discuss the significance of findings and recommendations for improvement in health. A comprehensive medical report is sent to the patient within 7 days of the assessment.

If the Doctor sees reason, it may be suggested that patients participate in one of the health management programmes – Health Coaching, Nutrition Consultation, Personal Training or a Psychological Health Program.

## **Health Assessment Package includes:**

- Medical and Lifestyle Questionnaire
- Full medical examination
- Pathology – Full blood count and chemistry
- Exercise Stress Test
- Height/Weight/BMI
- Flexibility
- Lung Function
- Comprehensive report on all findings with recommendations

Additional tests based on personal profile, age and gender include bone mineral densitometry, mammograms, breast ultrasounds, CTCA and prostate tests.

# Interventional Neuroradiology

**Interventional Neuroradiology is a specialised field in radiology that focuses on diagnosing and treating vascular issues in the brain, head & neck, and spine**

It uses a minimally invasive approach, navigating through the body's natural arteries and veins to treat conditions, often without open surgery. Our doctors are amongst the most highly-trained, well-respected and experienced operators in Australia. We work as a multidisciplinary team with colleagues in Neurology,

Neurosurgery, Ear, Nose and Throat Surgery and Ophthalmology, ensuring coordinated care for patients in both regular and intensive care units. Our goal is to provide effective management for a variety of Neurovascular disorders through a collaborative, evidence-based approach.

# Medical Imaging

## St Vincent's Clinic Medical Imaging & Nuclear Medicine (SVCMI&NM) is a private practice operated by St Vincent's Private Hospital Sydney and Specialist Radiologists.

Areas of specialisation include Neuroradiology, Musculoskeletal Imaging, Oncology, Nuclear Medicine, Breast, Obstetric & Gynaecological Imaging, Body Imaging including- Pelvic, Abdominal and Prostate, Vascular and Interventional Radiology.

We are located on Level 5, Suite 501 of St Vincent's Clinic and provide services to inpatients and outpatients of both the Clinic and St Vincent's Private Hospital. We offer a wide range of services including:

- **Magnetic Resonance Imaging (MRI) 3.0T & 1.5T**
  - General MRI Imaging
  - Neuro MRI- Neuroquant
  - Head and Spine Imaging
  - Musculoskeletal Imaging
  - Breast and Abbreviated Breast MRI (AB-MR)
  - Abdominal Imaging
  - Prostate Imaging
  - FerriScan - Liver Iron concentration Imaging
  - Prostate Imaging
  - MRI Breast Biopsy
- **CT scans** – Multi-slice Computerised Tomography
  - General CT Imaging with Fluoroscopy
  - Interventional procedures including radiofrequency ablation, facet and nerve injections, biopsies and drainage procedures
  - Cardiac Imaging
- **Ultrasound** – with Bariatric tables
  - General Ultrasound
  - Vascular/Doppler
  - Musculoskeletal
  - Breast
  - Fine Needle aspiration and core biopsy
  - Obstetrics and gynaecology
- **Digital X-ray**
- **Screening Procedures** – with 90° table tilt capability
  - Barium studies
  - Cystograms
  - Speech pathology video swallows

- **Intra-operative and Mobile Imaging**

- **Mammography**

- 2D Mammography
- 3D Mammography tomosynthesis
- Stereotactic localisation and breast biopsy

- **Nuclear Medicine with 3D CT SPECT**

- Full range of Nuclear Medicine diagnostic tests including bone scan, bone marrow scan, brain scan, colonic transit scan, DTPA MAG3, DMSA renal scan, gallium scan, gastric emptying scan, gastrointestinal blood loss study, gated heart pool Study (GHPS), hepatobiliary scans, leukoscan, liver & spleen scan, lung scan, Meckel's diverticulum scan, myocardial perfusion rest/stress scan, octreotide scan (Indium), oesophageal transit scan, parathyroid scan, red blood cell liver or spleen scan, salivary scan, sentinel node lymphoscintigraphy, PYP cardiac amyloid scan, gastric reflux study and thyroid scan
- Several therapeutic services including Iodine-131 for thyrotoxicosis

- **Interventional Procedures**

- Drainage and biopsy of all areas
- Image guided facet joint and peri-neural (foraminal block) injections plus radiofrequency ablation
- Joint and bursal steroid injections
- Vacuum assisted breast biopsy

### Hours of Operation:

#### CT, X-ray, Ultrasound, Mammography and Procedures

Monday to Friday: 8:00am to 5:30pm

#### MRI

Monday to Friday: 7:00am to 9:00pm

Saturday and Sunday: By appointment

#### Nuclear Medicine

Monday to Friday: 8:30am to 5:30pm

# Medical Imaging (continued)

We are closed for outpatient services on public holidays but available 24 hours, 365 days a year for inpatient services.

Same day appointments are accommodated for most studies, including CT, MRI & Mammography, wherever possible. No appointment is necessary for General X-ray studies.

For further information please call: (02) 9044 3200 or visit our website [www.svcmi.com.au](http://www.svcmi.com.au)

# Medical Oncology

## The Medical Oncology team from the Kinghorn Cancer Centre provides inpatient and outpatient medical oncology services for patients of St Vincent's Clinic.

The Medical Oncologists work in close collaboration with surgical and radiation oncologists. The department also works with palliative care, genetics, theranostics and haematology.

The department has a large clinical trials unit and a dedicated team of oncologists and research staff with specialised expertise in treating patients on early phase clinical trials with novel targeted and immunotherapy agents. Recognised by the NSW Cancer Institute for the Best Cancer Clinical Trials unit in 2018-19, the coordinated "precision medicine" approach of the multi-disciplinary team aims to consistently achieve the best outcomes for patients.

Patients who are being investigated for, or who have been diagnosed with cancer are provided with holistic management of their disease. All treatment options are considered within the context of patient comorbidities and wishes, and clearly defined treatment aims.

Excellence in communication with patients, their families, their General Practitioner and other health professionals is provided. Where appropriate, patients are discussed at Multidisciplinary Clinics to ensure access to best practice, including the possibility

of being included in clinical trials. Cancer patients are seen in a timely manner, and will always be

accommodated in a short timeframe, according to their needs. The privacy and efficiency of the practice at St Vincent's Clinic allow optimal management of patients with this confronting diagnosis.

Urgent appointments are made at referring doctors' request.

### The Kinghorn Cancer Centre team comprises of:

- **Dr Meg Barnet** – Expertise in Gastrointestinal (Upper, Lower) and Lung Cancer
- **Dr Julia Chen** – Expertise in Breast Cancer
- **A/Prof Venessa Chin** – Expertise in Lung and Head & Neck Cancers
- **Dr Rasha Cosman** – Head of Clinical Trials, Expertise in Phase 1 clinical trials, Skin Cancers (Melanoma, Basal and Squamous) and Ocular Cancers
- **Dr Megan Crumbaker** – Expertise in Genito-urinary Oncology
- **Dr Rachel Dear** – Expertise in Breast Cancer
- **Prof Anthony Joshua** – Head of Department, Expertise in Genito-urinary (Prostate, Bladder, Kidney, Adrenal), Skin Cancers (Melanoma, Basal and Squamous) and Ocular Cancers
- **Dr Michael Krasovitsky** – Expertise in geriatric oncology, supportive care, and breast, lung, liver and thyroid cancers
- **Prof Elgene Lim** – Head of Research, Expertise in Breast Cancer
- **Dr Jia (Jenny) Liu** – Expertise in Phase 1 clinical trials, Head & Neck and Skin Cancers
- **A/Prof Hao-Wen Sim** – Expertise in Neuro-Oncology, Upper Gastrointestinal Oncology and Biostatistics
- **Dr Subotheni Thavaneswaran** – Expertise in Gastrointestinal (Lower) and Neuro-Oncology
- **Dr Andrew Yam** – Expertise in Genito-urinary Oncology

# Melanoma & Skin Cancer Surgery

**The department of Surgical Oncology provides specialised care for patients with melanoma and all types of skin cancer.**

Surgeons within the department hold appointments at St Vincent’s Public and Private Hospitals. All the members of the department have undergone advanced post-fellowship training in Surgical Oncology at prestigious overseas centres.

We provide care for patients with localized and metastatic disease, and perform the most modern surgical techniques.

Consultations for both public and private patients are provided in our offices on level 7 of St Vincent’s Clinic.

Patients with urgent problems can be seen at short notice, often on the day of referral.

Surgeons in the department work closely with specialists in Dermatology, Medical Oncology, Radiation Oncology, Plastic and Reconstructive Surgery and Cancer Genetics within the St Vincent’s campus to provide truly multidisciplinary care for patients with cancer.

Our aim is to provide excellent cancer care, from early diagnosis to ongoing management and follow up. All patients are presented at our regular multidisciplinary tumour group meetings held at the Kinghorn Cancer Centre to ensure that all their care is fully coordinated within the one centre of excellence.

# Nephrology

**The Department of Nephrology provides comprehensive inpatient and outpatient consultations covering all aspects of nephrology, hypertension, dialysis and renal transplantation.**

Providing over 4,000 consultations per year, the Department consists of Prof Jacob Sevastos (Head of Department, St Vincent's Public and Private Hospitals) and Dr Mark Penny.

Both physicians work in close collaboration with all disciplines within the St. Vincent's Private and Public Hospitals and the St. Vincent's Clinic. Both are Fellows of the Australasian College of Physicians, members of the Australian and New Zealand Society of Nephrology and of the International Society of Nephrology. Prof Sevastos is also a member of the American Society of Nephrology, the Transplantation Society of Australia and New Zealand and The Transplantation Society.

The Department is actively involved in both undergraduate and postgraduate medical teaching and research.

**The Department offers consultations for the investigation and treatment of:**

- Acute and chronic kidney diseases inclusive of renal biopsies
- Electrolyte and acid/base imbalances
- Renal complications of systemic diseases and advice on immunosuppressant therapies
- Hypertension
- Dialysis, both acute and long-term, either haemodialysis or peritoneal dialysis
- Renal transplantation, with St. Vincent's Private Hospital being the only Private Hospital in NSW offering an acute living transplant service (headed by Prof Sevastos).

Immediate consultations are available for urgent cases.

# Neurology

## The Neurology Department provides a clinical and diagnostic service for assessment and management of patients with disorders of brain, spinal cord, nerve and muscle.

There is close liaison with the Neurosurgery Department and conjoint weekly meetings are held to discuss the management and investigation of complex cases.

All members of the Department are members of the Australian and New Zealand Association of Neurologists, Fellows of the Royal Australasian College of Physicians and belong to subspecialist societies according to their interests.

### Services include:

- Clinical Neurophysiology, comprising:
  - EEG
  - Nerve conduction studies and electromyography, including single fibre studies
  - Somatosensory evoked potentials and motor evoked potentials
- CT scanning / CT spinal angiography
- MRI
- CSF analysis
- Botulinum toxin for neurological conditions, including dystonia and migraine
- Deep brain stimulation for Parkinson's Disease, Dystonia and Tremor

### Subspecialty expertise includes (but is not limited to):

- Cerebrovascular disease (stroke)
- Dementia and cognitive disorders
- Epilepsy
- Headache (including migraine)
- Motor Neurone Disease
- Movement disorders including Parkinson's Disease, dystonia and tremor
- Multiple Sclerosis
- Neuroimmunology
- Neuromuscular (peripheral nerve and muscle) disorders
- Neuro-oncology
- Pain diagnosis and management
- Spinal cord and nerve root disorders (compressive, inflammatory etc)

A same day service is available for direct urgent GP referrals. Department members are involved in registrar training and basic neuroscience and clinical trials.

# Neurosurgery

**The Department of Neurosurgery is one of the largest neurosurgical units in NSW. It treats over 3,000 patients per year, has dedicated neurosurgical wards in both Public and Private Hospitals, and has an operative caseload of more than 1,500 cases per year at St Vincent's Private Hospital.**

**The Department provides services for all aspects of Neurosurgical problems, including:**

- Spinal Disorders for acute disc prolapse, sciatica and brachialgia, degenerative disorders of spinal canal stenosis; both benign and malignant spinal tumours. This involves open, minimally invasive and percutaneous procedures and instrumentation and artificial disc for complex spinal procedures.
- Cerebral tumours, both benign and malignant tumours, both primary glioma and metastases. Stereotactic localisation and navigation is an essential part of this surgery, biopsy and excision of tumours.
- Skull base tumours, in association with the Head & Neck and Otolaryngology Departments. Endoscopic approaches to pituitary tumours and anterior skull base tumour are undertaken, and removal of acoustic tumours.
- Neurovascular both open procedures and neurointerventional, for aneurysm, AVMs and stroke.

- Functional Stereotaxy for movement disorders, deep brain stimulation for Parkinson's Disease and dystonia.
- Hydrocephalus and CSF circulation disorders syringomyelia.

All the members of the Neurosurgery Department are Fellows of the Royal Australasian College of Surgeons and members of the Neurosurgical Society of Australasia.

The Department has three positions for neurosurgical training towards FRACS.

The Neurosurgical Department is involved in the Research Strategic Plan with the aim of becoming a centre of excellence for neurosciences research.

Emergency and urgent consultations can be made by contacting the offices listed below.

# Nuclear Medicine

**St Vincent’s Clinic Medical Imaging & Nuclear Medicine SVCMI&NM offers a wide range of services.**

**These services include:**

- 3D CT SPECT
- Full range of nuclear medicine diagnostic tests including:
  - Bone Scan
  - Bone Marrow scan
  - Brain Scan
  - Colonic Transit Scan
  - CSF Shunt Study
  - DTPA MAG3, DMSA Renal Scan
  - Gallium Scan
  - Gastric Emptying Scan
  - Gastrointestinal Blood Loss Study
  - Gated Heart Pool Study (GHPS)
  - Hepatobiliary Scans
  - PYP Cardiac Amyloid Scan
  - Leukoscan
  - Gastric Reflux Study
  - Lower limb Lymphoscintigraphy
  - Lung Scan
  - Meckel’s Diverticulum Scan
  - Myocardial Perfusion Rest/Stress Scan
  - Octreotide Scan (Indium)
  - Oesophageal Transit Scan
  - Parathyroid Scan
  - Red Blood Cell Liver or Spleen Scan
  - Salivary Scan
  - Sentinel Node Lymphoscintigraphy, Roll, Snoll
  - Thyroid scan
- Therapeutic services including Iodine-131 for thyrotoxicosis

For further information please call (02) 9044 3200  
or visit our website [www.svcmi.com.au](http://www.svcmi.com.au)

A/Prof Nicholas Pocock	9044 3200	9169 3460

# Oesophageal Diagnostic Services

**Oesophageal Diagnostic Services is an open-access service to all clinicians providing physiological studies for the investigation of:**

- Heartburn
- Atypical chest pain
- Reflux related cough/dysphonia
- Dysphagia
- Regurgitation/vomiting
- Assessment for anti-reflux surgery
- To ascertain the pressure of the lower sphincter zone and presence of hiatal herniation
- For the accurate placement of pH electrodes for 24 hour pH monitoring
- Before surgical treatment for reflux, particularly in those patients undergoing surgery or if there is diagnostic uncertainty
- In the assessment of patients with complex oesophageal disorders

**Indications for ambulatory pH monitoring:**

- For the definitive diagnosis of gastro-oesophageal reflux in patients sufficiently symptomatic to have warranted endoscopy but in whom endoscopy is normal or equivocal
- To investigate the possibility of acid reflux as a cause of atypical symptoms such as angina-like chest pain, respiratory and laryngeal symptoms in whom the relevant investigations have been inconclusive and to correlate such symptoms with reflux episodes
- When established gastro-oesophageal reflux responds poorly to optimal medical therapy and particularly when surgical treatment is contemplated
- In the assessment of patients with complex oesophageal disorders

Ian P Adams is a Medical Physiologist with almost 45 years experience and 100,000 patient cases in both the United Kingdom and Australia.

Prof Michael Talbot's areas of interest:

- Motility Studies/Dysphagia and Reflux Assessment
- High Resolution Impedance Manometry
- 24 hour Standard Dual Channel pH studies
- 24 hour pH and Impedance studies
- BRAVO catheter-free 96 hour Reflux studies

**Indications for oesophageal manometry:**

- To establish the diagnosis and categorise suspected oesophageal motility disorders such as achalasia and diffuse spasm in patients with dysphagia or chest pain in whom other investigations are negative or equivocal

# Ophthalmology

**The Eye Department of St Vincent's Clinic provides a complete range of ophthalmic medical and surgical procedures. There are sub-specialists covering every aspect of ophthalmic treatment and these ophthalmologists are recognised as leaders in their field.**

In addition to specialised treatment, routine eye examinations and visual assessments are carried out. The members of the Department have access to the most modern ophthalmic surgical facilities in the Clinic's Day Surgery Unit as well as access to all forms of medical ophthalmic laser treatment.

The Day Surgery Unit is fully equipped for all aspects of corneal surgery, cataract surgery, glaucoma surgery and oculoplastic surgery. These procedures are usually carried out as day only, but when indicated patients can stay overnight in St Vincent's Private Hospital.

The department's consulting rooms have the latest diagnostic ophthalmic equipment, including visual field analysis, retinal photography and angiography, ophthalmic ultrasound and OCT (optical coherence tomography) for detailed optic nerve evaluation, especially for glaucoma and retinal evaluation for macular degeneration and diabetic retinopathy.

There are also three lasers in the department – Argon laser to treat retinal conditions, YAG laser for post-cataract surgery capsulotomy and SLT laser for glaucoma.

# Orthopaedic Surgery

## The Orthopaedic Department provides a complete adult orthopaedic and trauma service.

The Department is active in both basic science and clinical research with the Departments of Vascular Medicine and the Department of Rheumatology, as well as the Garvan Institute of Medical Research.

The Department carries out approximately 1,000 joint replacements per annum across the Campus and attracts extensive referrals in primary and complex revision total joint replacement.

The Department is well represented both in the activities of the Australian Orthopaedic Association and at a regular scientific and clinical conferences, both in Australia and overseas.

### The principal activities of the Department are:

- Adult joint reconstruction and replacement, complex revision joint replacement
- Bone transplantation and allografting
- Reconstructive surgery of the foot and ankle
- Shoulder and elbow surgery
- Arthroscopic knee and ligament reconstruction
- Musculoskeletal oncology
- Trauma and reconstructive surgery following fracture.

# Otolaryngology – Head & Neck Surgery (ENT)

**The Department of Otolaryngology – Head and Neck Surgery (Ear, Nose & Throat) provides a broad range of services with members of the Department having subspecialty interest and expertise.**

The Department has an international reputation for management of head and neck cancer, including robotic surgery, skull base surgery, acoustic neuroma surgery and ear surgery.

## Ear Surgery and Implantable Hearing Aid Surgery

- Adult ear and paediatric ear disease
- Implantable hearing aids and cochlear implants
- Stapedectomy / Laser

## Acoustic Neuroma Surgery and Skull Base Surgery

- Including tumours of the ear, lateral skull base and anterior skull base

## Head and Neck Tumour Surgery

- Benign and malignant tumours
- Transoral robotic surgery
- Transoral laser surgery
- Partial laryngeal surgery
- Nasal and Sinus Tumours
- Salivary gland surgery
- Thyroid surgery

## Nasal and Sinus

- Treatment of sinus disease
- Treatment nasal obstruction

## Laryngology

- Management of voice and airway disorders
- Management of vocal cord palsy, laryngeal and tracheal stenosis by endoscopic and external techniques
- Multidisciplinary Voice Clinic

Please refer to Head and Neck page for more detail.

# Pathology

**Two pathology groups practise at the Clinic. Senior scientific and medical staff are available 24 hours a day, seven days a week. Specialists are always available for consultation on interpretation of test results and advice regarding the management of patients.**

The pathology practices are:

**St Vincent's Pathology Service (SydPath)**  
Please refer to below for more information.

**Douglass Hanly Moir Pathology**  
Please refer to the next page for more information.

## St Vincent's Pathology Service (SydPath)

**St Vincent's Pathology (SydPath) provides a specialist 24/7 onsite laboratory and comprehensive diagnostic pathology services.**

SydPath's dedicated team of pathologists, scientists and blood collectors provide a market-leading pathology service that includes a comprehensive range of onsite testing, hardcopy and electronic reporting and expert consultative support.

### **Our pathologists:**

- Provide a diagnostic and a consultative service covering all disciplines of pathology
- Participate in clinical reviews both on and off campus
- Perform Bone Marrow Aspiration, Fine Needle Aspiration and Frozen Sections
- Are actively involved in research projects of their own, as well as in conjunction with researchers across the campus including the Kinghorn Cancer Centre, The Garvan Institute and local and international collaborators
- Provide and support medical education for the Faculty of Medicine of the University of New South Wales

### **Specialised services include:**

- Therapeutic drug monitoring to individual drug dose in patients via our State Referral Laboratory
- NSW State HIV State Reference Laboratory
- Clinical Trial management for international and local trials – Stage I and IV

### **Collection services:**

SydPath's pathology collection staff provide:

- Regular ward rounds to inpatients of St Vincent's Private and Public Hospitals
- Collection services from 8:00am to 6:00pm for patient convenience, located at Suite 507A, St Vincent's Clinic
- 24 hour urgent blood collection service
- Domiciliary Service

SydPath operates a network of collection centres throughout Sydney metropolitan area, and laboratory and collection facilities in Moree and Narrabri NSW.

### **Reporting services:**

SydPath provides the following options to result reporting alternatives:

- Hard Copy Reports
- Result download service to practice management software
- Secure web based reporting allowing real-time access to results
- Cumulative reports
- Graphs for results
- Patient collection instruction available online
- Online ordering of pathology supplies
- A specialised reporting module, Powerpath, for Histology, Cytology, Cytogenetic and Cancer Genetic testing results

For further information visit our website at [www.syddpath.com.au](http://www.syddpath.com.au)

Name	Telephone	Facsimile
St Vincent's Pathology Service (SydPath)	8382 6590	8382 6591

# Douglass Hanly Moir Pathology

## Douglass Hanly Moir Pathology (DHM) provides comprehensive 24-hour specialist pathology services tailored to the needs of the St Vincent's Campus.

Our practice includes more than 100 specialist pathologists, who provide a diagnostic and consultative service appropriate to the requirements of a large tertiary referral hospital. Our pathologists warmly encourage doctors to contact them if they can be of assistance in any way. Pathologists are available to discuss individual patients and to provide information or advice on ordering tests, result interpretation, or any aspects of pathology. Our fundamental aim is to deliver a highly professional and personalised service to referring doctors, in order to provide the best possible pathology care for patients.

### Our pathology practice offers:

- 24-hour operation, 365 days a year
- Collection centre conveniently located onsite
- Rapid turnaround of results
- A no-gap agreement with the major health funds
- Sonic Dx – online access to pathology results, anywhere, anytime. Securely share reports with colleagues or patients, generate custom reports, view cumulative results and request additional tests electronically. Visit [sonicdx.com.au](http://sonicdx.com.au) or download the Sonic Dx app.
- Sonic Edu – a centralised app providing doctors with immediate access to our comprehensive and current pathology reference library of handbooks and guides. Visit [sonicedu.com.au](http://sonicedu.com.au) or download the Sonic Edu app.
- Publications and ongoing educational seminars, conferences and audits to assist doctors in meeting CPD requirements. To learn more, visit [dhm.com.au](http://dhm.com.au) or [soniceducation.com.au](http://soniceducation.com.au).

### Our Collectors:

- Conduct regular hospital ward rounds for inpatients
- Perform routine collections for outpatients
- Provide a 24-hour service for urgent collections
- Record ECGs and provide a 24-hour Holter monitor service, as well as Ambulatory Blood Pressure Monitoring
- Are available for paediatric collections by appointment

### St Vincent's Clinic Collection Centre

# Plastic & Maxillofacial Surgery

## A comprehensive service is provided in Plastic and Reconstructive Surgery.

### Services include:

- Skin tumour surgery, with minor and major reconstruction
- Facial cosmetic surgery, including rhinoplasty, upper and lower eyelid surgery, facelift, ear, brow and other facial rejuvenative surgery
- Breast reduction, augmentation and reconstruction after mastectomy
- Abdominal reduction 'tummy tuck', standard or ultrasonic liposuction and liposculpture (fine filament fat injections)
- Hand surgery following injury, and for Dupuytren's contracture, nerve/tendon compression and other established disorders
- Microsurgery including free tissue transfer, nerve reconstruction, facial reanimation and tissue replantation after amputation

- Maxillofacial surgery for post-traumatic, neoplastic and aesthetic conditions
- Surgery for prominent ears and for other congenital disorders, especially of the face, hand and genitalia

Procedures are performed as an inpatient at

St Vincent's Hospital, St Vincent's Private Hospital or at a choice of other hospitals, in Clinic Day Surgery Unit, or (in some instances) in the rooms.

The surgeons are Fellows of the Royal Australasian College of Surgeons and members of the Australian Society of Plastic Surgeons and the Australasian Society of Aesthetic Plastic Surgery.

# Podiatry

## The department of Podiatry provides a comprehensive service for the assessment and treatment of foot and ankle pain and disorders.

Podiatry is a medical science of foot and ankle health and its postural relationship with the rest of the body. It focuses on the medical and mechanical aspects of the lower limb.

### This service includes the treatment of:

- Foot and ankle pain
- Heel pain
- Pre/post foot surgery support
- Tendonopathies
- Arthritis
- Paediatric assessment and treatment

- Diabetic assessment and treatment
- Ingrown nails, fungal skin and nail conditions
- Corns and verrucae

### Treatment may include:

- General nail and skin care
- Prescription and/or balanced off-the-shelf orthotics
- Shoe advice
- Stretches, exercises and training techniques
- Investigations
- Appropriate referrals to other specialists to complete a comprehensive treatment plan

# Psychiatry

## A comprehensive service is provided in Psychiatry.

Dr Gregory McLean's expertise is in the treatment of adults and the elderly in the areas of depression and anxiety disorders, bipolar mood disorders and schizophrenia.

Dr Deepinder Miller is an adult generalist psychiatrist who treats adults and late adolescents who suffer from

ADHD, mood disorders, anxiety disorders, psychotic illness, clozapine clinic and drug and alcohol misuse. She also works in the area of family therapy, forensic psychiatry and medicolegal report writing (civil).

Dr Miller has a special interest in the psychological impact of prostate cancer.

Dr Clinton White has an interest in Adult Psychiatry (aged 18 to 65 inclusive), Mood Disorders, Anxiety Disorders and ADHD. He does not practice psychotherapy. Dr White also has subspecialised training in Consultation Liaison Psychiatry, a psychiatric specialty focusing on the interface between medical illness and psychiatry.

Dr Owens treats adults aged 18 and over and has a special interest in mood disorders, cognitive disorders, and neuropsychiatry, as well as mental health issues in adults over age 65. He can also develop plans to help reduce the risk of delirium in older patients undergoing elective surgery.

# Psychology

## The Department of Psychology consists of Clinical Neuropsychologists and Clinical Psychologists who see adults over the age of 16.

### Clinical Neuropsychology

Clinical neuropsychologists conduct cognitive assessments of a range of neurological disorders including traumatic brain injury, stroke, dementia and other progressive neurological disorders (e.g. Parkinson's disease, Multiple Sclerosis).

See below for further information.

**Dr Ilana Hepner** (Head of Department) is a full member of the APS College of Clinical Neuropsychologists with expertise in the neuropsychological assessment of clients 18 years and older across a range of neurological, medical and psychiatric conditions (e.g., neurodegenerative disease / dementia, traumatic brain injury, stroke, epilepsy, brain tumour, ADHD, depression, schizophrenia, substance dependence). Her interests include acquired brain injury, neurodegenerative disease/dementia, decision-making capacity and cognitive rehabilitation. Dr Hepner routinely provides assessments of decision-making capacity and medico-legal reports for both civil and criminal matters.

**Dr Jeanette Stewart** is a member of the APS College of Clinical Neuropsychology and Clinical Psychology. She is the Head of the Psychology Department at the Clinic. Her clinical interests include assessment of cognitive functioning in neurological/ neurosurgical patients, including those with head injury, dementia, stroke, infections, or other general medical conditions. In addition, she has an interest in the assessment of capacity (testamentary capacity, capacity for managing affairs, etc) and regularly provides medico-legal reports for civil and criminal matters. She specialises on working with adult patients over the age of 16.

**Dr Molly Schafer** is a member of the Australian Psychological Society and a fellow of the College of Clinical Neuropsychologists. She has been working as a clinical neuropsychologist for over 14 years in the public and private sectors. Her private practice focuses on working with clients aged 16 and over who may be suffering from any of the following conditions: dementia, acquired brain injury due to cardiovascular disease, epilepsy, psychiatric illness, motor vehicle accidents, assaults, drug and alcohol abuse and developmental disorders such as FASD, ADHD or learning disabilities. She regularly undertakes capacity assessments concerning personal decision making, financial management and testamentary concerns and medico-legal reports for criminal and civil matters.

**Dr van den Berg** received a doctorate in clinical neuropsychology from Macquarie University in 2010. She is a fully registered psychologist with the Australian Health Practitioner Regulation Agency with neuropsychological endorsement. Dr van den Berg has over fifteen years' experience conducting neuropsychological assessments in a variety of settings and with a range of conditions, including developmental disorders, neurological conditions, neurodegenerative disorders, acquired brain injury, intellectual impairment, substance abuse, psychiatric conditions and personality disorders. She provides medicolegal reports, for both civil and criminal matters, including assessments of decision-making capacity (testamentary capacity, capacity to manage affairs etc).

### Clinical Psychology

Clinical psychologists provide a wide range of psychological services (including assessment, diagnosis and treatment) to individuals with psychological conditions that range from mild to severe and complex.

**Jo Langham** is a Clinical Psychologist, member of the APS College of Clinical Psychologists, Fellow of the Australasian College of Biomedical Scientists and a Churchill Fellow. Prior to establishing Private Practice in 1995, Ms Langham had state-wide managerial responsibility for specialist teams implementing new government policies in the NSW Department of Education, experience of great value when supporting clients presenting with work-related adjustment and stress.

Clinical interests include evidence based therapies – CBT, Schema and Solution Focussed, Biofeedback, EMDR, Narrative therapy and Hypnosis in the treatment of:

- Anxiety and mood disorders – depression, panic, phobias, OCD, anger management
- Trauma, grief and bereavement – adjustment disorders, PTSD, illness related
- Relationships - work and personal
- Pre and post-operative adjustment – anxiety, claustrophobia, conversion disorders
- Pain management

# Radiation Oncology

**GenesisCare St Vincent's is a centre of excellence providing comprehensive radiation services with care focused on the individual and available where and when you need it most. It is designed to help give you the best life outcome.**

**Our treatments and services:**

*Radiation oncology*

- MR Linac
- External Beam Radiation Therapy
- Volumetric Modulated Arc Therapy
- Stereotactic Ablative Body Radiotherapy (SABR)
- Stereotactic Radiosurgery (SRS)
- Low Dose Rate Brachytherapy
- Total Body Irradiation (TBI)
- Intensity Modulated Radiation Therapy

**Allied Health Services:**

- Lymphoedema support
- Massage Therapist
- Psychologist
- Speech Pathologist

*Through Kinghorn Wellness Centre*

- Exercise Physiologist
- Reflexology
- Acupuncture

Our staff includes doctors, nurses, radiation therapists, and physicists. They are part of the multidisciplinary teams, dedicated to providing excellent patient care.

Additionally, they are involved in ongoing research that allows access to a range of international and local clinical trials.

GenesisCare has developed close links with other specialists involved in the diagnosis and treatment of cancer via a range of multidisciplinary clinics. We have integrated participation in high quality multidisciplinary clinics for head and neck cancers, breast cancers, prostate cancers and other urological cancers, gastrointestinal cancer, skin and melanoma cancers and neurological cancers.

The MRLinac is the first for GenesisCare and is the State-of-the-art technology which allows our radiation oncologists for the first time to visualise the cancerous tissue during treatment, combining MRI diagnostics

with highly targeted radiation therapy. It will allow us to target more complicated cancers such as those in the pancreas with much higher precision. This combined technology significantly minimises the risk of side effects, whilst reducing the overall burden of disease on patients. The machine will enable our radiation oncologists to treat more people with unprecedented accuracy.

Our state-of-the-art equipment is comprised of ten linear accelerators, 6 CT scanners, Australia's first Gamma Knife, and an Integrated Brachytherapy Theatre providing Low Dose Rate Brachytherapy. The linear accelerator technology has image Guided Radiation Therapy (IGRT), which allows for greater accuracy and precision of tumour delineation and treatment.

GenesisCare also has a comprehensive stereotactic service giving patients access to Australia's first and only Gamma Knife (GK) in Macquarie University Hospital, a form of stereotactic radiosurgery (SRS). Stereotactic radiosurgery is a highly precise, non-invasive treatment either in a single fraction or in multiple visits.

SRS, initially developed to treat small brain tumours and functional abnormalities of the brain, is also delivered safely and effectively using our linear accelerators across our NSW treatment centres.

Stereotactic body radiation therapy techniques (SBRT), also known as Stereotactic ablative radiation therapy (SABR), uses high dose per fraction radiation therapy delivered with extreme precision to the tumour, whilst sparing organs at risk. Treatment is commonly used for bone metastases, nodal metastases, prostate cancers, lung cancers and liver cancers. Treatment is available across our NSW centres.

Deep Inspiration Breath Hold (DIBH) is a technique used for patients with left sided breast cancer undergoing radiation treatment. Deep Inspiration Breath Hold (DIBH) is one way to minimise the radiation dose to the heart. Treatment is available across our NSW treatment centres.

# Rehabilitation Medicine

**The Department provides an assessment and treatment service in all fields of adult rehabilitation medicine. This is offered to both outpatients and inpatients of St Vincent's Private Hospital.**

St Vincent's Private Hospital has a 12 bed State of the Art Rehabilitation Unit with a gym, communal therapy areas, a day rehabilitation hospital and a hydrotherapy pool.

**Conditions treated include:**

- Musculoskeletal rehabilitation for patients with fractures, arthritis, soft tissue injuries, fractured hip, joint replacements and multiple trauma
- Neurological disease such as stroke, multiple sclerosis, Parkinson's disease, neuropathy or myopathy
- Older people's general rehabilitation including decreased mobility, incontinence and falls prevention
- Amputee rehabilitation – pre-operative assessments, pain management assessment and treatment
- Traumatic brain injury and acquired brain injury
- Chronic pain and chronic fatigue
- Work injury rehabilitation
- Motor accident rehabilitation
- Developmental disability
- Medico-legal assessment

The service assesses people and refers them to our inpatient and day hospital facility or to appropriate rehabilitation hospitals and outpatient services in their area. Special interests of the service members include:

- Post stroke rehabilitation
- Musculoskeletal rehabilitation
- Pain management
- Interventional procedures in pain management are also offered
- Online pain management

This service also sees patients using telehealth via computer, smart phone or tablet. This assists patients in rural settings and in aged care facilities.

# Rheumatology

## The Rheumatology Department has strong clinical and research interests in a range of Rheumatic and Musculoskeletal Diseases (RMD).

In St Vincent's Clinic we work closely with multidisciplinary colleagues both in the clinic and across the Private and Public Hospital Campus, along with conducting research at the Garvan Institute of Medical Research and the St Vincent's Centre for Applied Medical Research. We are affiliated with the University of NSW and Notre Dame University of Australia (Sydney Campus).

St Vincent's Hospital Rheumatology is a tertiary and quaternary referral centre as well as providing a local service. We reflect this in the private setting as well, accepting referrals from around the state in line with our specialty interests.

The Chair of Rheumatology is Dr Laila Girgis, who co-ordinates activities in Rheumatology across the campus, including our research interests.

Dr Girgis has strong clinical and research interests in rheumatoid arthritis, including research into personalised and precision medicine in the selection of disease modifying anti-rheumatic drugs. Other interests include the use of nailfold videocapillaroscopy in the assessment of Raynaud's syndrome, scleroderma and myositis overlap, connective tissue diseases, interstitial lung disease and pulmonary hypertension. Our Rheumatologists cover the full spectrum of inflammatory RMD.

### Specific conditions covered:

- Rheumatoid arthritis, psoriatic arthritis, and spondyloarthritis for assessment and treatment with conventional and biologic disease-modifying drugs (DMARDs)
- Scleroderma/ myositis overlap conditions and rare rheumatic disease
- Connective tissue disorders including lupus, vasculitis including giant cell arteritis and polymyalgia rheumatica
- Immune mediated inflammatory diseases and arthritis related to oncology therapy
- Screening for connective tissue disease, particularly in patients with interstitial lung disease and pulmonary hypertension
- Gout, particularly in heart/lung transplant patients

### Our Specialists

**Dr Laila Girgis:** Suite 710 "Heart/Lung/Rheumatology"

**Dr Malcolm Handel:** Suite 705A

# Sarcoma & Soft Tissue Tumour Surgery

**The department of Surgical Oncology provides specialised care for patients with benign and malignant soft tissue tumours.**

Surgeons within the department hold appointments at St Vincent's Public and Private Hospitals. All the members of the department have undergone advanced post-fellowship training in Surgical Oncology at prestigious overseas centres.

Consultations for public and private patients are provided in our offices on level 7 of St Vincent's Clinic.

Surgeons in the department work closely with specialists in Medical Oncology, Radiation Oncology, Plastic and Reconstructive Surgery and Cancer Genetics within the St Vincent's campus to provide truly multidisciplinary care for patients with cancer.

Our aim is to provide excellent cancer care, from early diagnosis to ongoing management and follow up. All patients are presented at our regular multidisciplinary tumour group meetings held at the Kinghorn Cancer Centre to ensure that all their care is fully coordinated within the one centre of excellence.

The department of Surgical Oncology provides care for patients with a broad range of tumour groups. These include the following:

- Sarcoma
- Lipoma
- Nerve sheath tumours
- Muscle tumours

# Sports Medicine

**The Department of Sports Medicine provides a comprehensive service for sports people of all levels and disciplines.**

For the weekend warrior, the weekday slogger or elite athlete, the Department’s sports doctors provide the highest level of care to have their clients back in the game as safely and quickly as possible.

The Sports Medicine Department is involved in the diagnosis, assessment and treatment of all musculoskeletal injuries, including workplace and overuse injuries. The Sports and Exercise Physicians are responsible for the health and fitness of elite teams, previously including the Australian Wallabies, GWS Giants and Tennis Australia. We are still involved in the ongoing care of the Australian 7’s Rugby team and the Australian Women’s Basketball team. They have also provided care at the last two Olympic Games, the 2016 Rio Olympics and the 2020 Tokyo Olympics.

**The principal activities of the Department are:**

- Sports Medicine
- Assessment and treatment of musculoskeletal injuries
- Assessment and treatment of workplace injuries
- Compartment pressure testing

# The Voice Centre Australia

## The Voice Centre Australia is devoted to the diagnosis, treatment, and prevention of voice disorders.

Previously known as the Voice Assessment Centre, The Voice Centre Australia has always adopted a multidisciplinary approach with both laryngologist (ENT surgeon) and speech pathologist present for the consultation, to ensure a comprehensive and combined approach to the patient for best outcomes.

We also work closely with other specialists including neurologists, respiratory physicians, gastroenterologists, dieticians, singing teachers, voice coaches, and oncologists.

We see both paediatric and adult patients and are always very happy to discuss with GPs any voice concerns they have for their patients and try to accommodate urgent referrals. While we understand the importance of voice for professional voice uses, we also are passionate about the voice for every person.

For any more information, please contact the Voice Centre Australia on (02) 8382 6255

### Conditions that we often diagnose and manage:

- Muscle tension dysphonia
- Vocal cord paralysis
- Vocal cord paresis
- Recurrent respiratory papilloma
- Benign Vocal cord lesions – cysts, polyps, sulci
- Vocal cord nodules
- Spasmodic dysphonia
- Presbylaryngeus
- Functional dysphonias
- Neurological Voice disorders eg Parkinsons, tremor, dystonia
- Gender dysphoria – voice feminisation

# Thoracic Medicine

**The Department provides a comprehensive diagnostic and therapeutic service in all fields of adult respiratory medicine. There is direct access to St Vincent's Private and Public Hospitals for inpatient management.**

**Diagnostic services available:**

- Bronchoscopy
- Respiratory function testing
- Pleural aspiration
- Fine needle lung biopsy
- Allergy skin tests and investigation of food intolerance
- Sleep service
- Assessment for lung transplantation and lung volume reduction surgery

- Comprehensive assessment of lung cancer including: EBUS (Endobronchial Ultrasound Guided Trans Bronchial Needle Aspiration) and PET Scanning
  - Insertion of endobronchial stents for airway stenosis
  - Insertion of endobronchial valves for emphysema
  - Endobronchial laser resection of tumours
- Special interests of unit members include unstable asthma, allergic disorders, difficulty to treat infections, occupational lung disease, management of chronic respiratory failure, sleep disorders, lung cancer, sarcoidosis.

# Thoracic: Sleep Medicine

**The Sleep Disorders Service investigates and manages a range of disorders, including excessive daytime sleepiness, snoring, sleep apnoea, respiratory failure in sleep, insomnia, circadian rhythm, and sleep movement disorders.**

A comprehensive multidisciplinary service is provided for the management of snoring and sleep apnoea using CPAP, weight management, upper airway surgery and mandibular advancement splints.

Special interests of service members include obesity and sleep apnoea, non-invasive ventilation of respiratory failure in sleep, narcolepsy (central sleep apnoea).

**Sleep services include:**

- Consultation
- Home-based PSG sleep studies
- Auto-CPAP & BPAP titration
- Overnight oximetry

# Upper Gastrointestinal & General Surgery

**The Department has expertise in Oncological Surgery of the Upper Gastrointestinal Tract and advanced laparoscopic techniques. It also manages a large number of non-malignant surgical conditions.**

## **These include:**

### **Oesophagogastric**

- Oesophageal reflux surgery
- Hiatal hernia surgery
- Surgery for achalasia
- Surgery for oesophageal and gastric malignancy
- Oesophageal function testing – motility, manometry, ambulatory pH monitoring including BRAVO catheterless pH probe

### **Hepatopancreatic and Biliary Surgery**

- Management of acute pancreatitis and its complications
- Surgery of benign and malignant tumours of the pancreas
- Laparoscopic cholecystectomy
- Laparoscopic exploration of the common bile duct
- Liver resection
- Resection of bile duct tumours
- Pancreatic resection open/laparoscopic

### **Bariatric and Metabolic Surgery**

- Gastric band, sleeve gastrectomy, gastric bypass, redo surgery
- Robotic bariatric surgery

### **Endoscopy**

- Panendoscopy, colonoscopy, ERCP, oesophageal dilatation and stenting
- Percutaneous endoscopic gastrostomy tubes, endoscopic management of GI haemorrhage

### **General Surgery**

(Includes advanced laparoscopy and robotic techniques where appropriate) splenectomy, staging of upper GI malignancy, adrenalectomy, division of adhesions, appendicectomy and hernia repair.

# Urology

**The Department of Urology offers a comprehensive consultative diagnostic and therapeutic service covering the whole spectrum of urology. In addition, an active research programme is run in conjunction with the Garvan Institute and The Kinghorn Cancer Centre.**

## Cancer of the Prostate

The unit has the largest experience in transperineal prostate biopsies, open and robotic radical prostatectomy and brachytherapy in Australasia. It was the first unit in New South Wales to perform robot-assisted radical prostatectomy and is the most experienced in New South Wales. Radiation therapy is delivered by the latest IMRT machine as well as low-dose-rate brachytherapy but in addition has recently introduced the MR Linac machine for targeted radiotherapy. Focal therapy with the NanoKnife has now been offered to select patients with prostate cancer for eight years and the unit is a major teaching centre. The multidisciplinary team has an MDT meeting second weekly to discuss complex cases.

The St Vincent's Prostate Cancer Research Centre coordinates research into prostate cancer and works closely with the Garvan Institute and The Kinghorn Cancer Centre. It coordinates the clinical aspects of prostate cancer research and is chaired by Professor Phillip Stricker. In addition, a Masters and PhD programme for teaching is performed there. It provides research into imaging MRI, PSMA PET scanning, the procurement of a large tissue bank and data base, focal therapy and theranostic. The centre however does not provide clinical prostate cancer services which are provided by our local urology practitioners (see below).

## Cancer of the Bladder

Superficial bladder cancer is managed with a full spectrum of diagnostic and therapeutic options. Included in these are intravesical immunotherapy with BCG, Blue Light diagnostic cystoscopy, intravesical chemotherapy and has a history of original research with combination of BCG and interferon.

For invasive bladder cancer, robotic cystoprostatectomy is offered as well as neobladder reconstruction and the latest forms of surgical treatment.

## Cancer of the Kidney and Testes

Cancer of the kidney is managed with robot-assisted partial nephrectomy as well as laparoscopic and open treatments as well as ablations. Testicular cancer management

includes retroperitoneal lymph gland dissection and full multidisciplinary care through the Medical Oncology Team.

## Benign Prostatic Hyperplasia

The unit offers the full spectrum of surgical and medical options in the treatment of benign hyperplasia including transurethral resection of the prostate, Holmium: YAG laser enucleation, GreenLight laser, UroLift procedure, bipolar and unipolar TUR, Rezum procedure and prostatic arterial embolisation. In addition, it offers a full workup of urodynamic assessment and all the medical therapies.

## Incontinence

A full assessment and treatment with outpatient urodynamic assessment, pelvic floor exercises and bladder training for male and female patients is offered. Surgical treatment includes intravesical Botox injection, sling procedures, ProACT devices and insertion of artificial sphincters.

## Stone Unit

A comprehensive stone unit with rigid and flexible ureteroscopy and laser as well as extracorporeal shockwave lithotripsy under anaesthesia with the latest technology are all offered.

## Andrology

The unit also has expertise in both the treatment of impotence, sexual rehabilitation and penile prosthetic surgery. In association with the Endocrinology Department it also manages hypogonadism. Finally, the treatment of infertility using vasovasostomy and vasoepididymostomy is also offered.

# Vascular Laboratory

## Clinic Vascular Laboratory

The Clinic Vascular Laboratory has been a part of the St Vincents campus for 30 years and is an established forerunner and recognised centre of excellence. We provide a dedicated vascular diagnostic service with patient centred care our priority.

Our team of experienced clinicians and sonographers are dedicated to all aspects of Vascular care.

### Appointments and Enquiries:

Telephone: (02) 8382 6645

Facsimile: (02) 8382 6658

Email: [reception@vasclab.com.au](mailto:reception@vasclab.com.au)

### Priority:

Same day scan and report for urgent appointments.

### Non Invasive testing:

#### Abdomen:

- Aorto-Iliac/AAA/EVAR
- Mesenteric
- Renal
- IVC/Iliac Veins
- Pelvic/Gonadal Veins

#### Cerebral:

- Cranial arteries/GCA protocol
- Carotid
- Vertebral
- Transcranial

### Hours of Operation:

Monday to Friday: 8:00am to 5:00pm

#### Lower Extremity:

- Arterial/Treadmill
- ABI
- Venous/DVT
- Varicose Veins
- Popliteal Entrapment

#### Upper Extremity:

- Arterial
- Venous
- AV-Fistula
- Thoracic Outlet

# Vascular Medicine

**Vascular medicine offers a comprehensive state-of-the-art care for diseases of the circulatory system. This includes veins, arteries, lymphatics and the circulating blood.**

**The Department's highly trained specialists provide expertise in the treatment and management of:**

- Venous diseases including deep vein thrombosis (DVT), pulmonary embolism (PE) and associated clotting disorders; anticoagulation and chronic venous insufficiency, varicose veins and thrombophlebitis
- Arterial diseases caused by atheroma (cholesterol plaques), arterial thrombosis and embolism; inflammation (vasculitis) and vasospasm disorders (Raynaud's phenomenon and chilblains)
- Lymphatic diseases including primary and secondary forms of lymphoedema (leg swelling) and other causes of lower limb swelling
- Assessment and management of cardiovascular risk factors that contribute to arterial and venous disease
- Perioperative and general medical care
- Vasculitis
- Lower limb wounds and ulcers
- Disorders of autonomic cardiovascular reflex function
- Congenital vascular malformation and developmental anomalies, including fibromuscular dysplasia

# Vascular Surgery

## The Department of Vascular Surgery treats patients with the diseases of the arteries, veins, and lymphatics.

**These include:**

- All aspects of arterial disease, occlusive, non-occlusive and aneurysmal disease are managed with open and endovascular therapy. Common conditions treated include extracranial disease for treatment and prevention of stroke. Aneurysms of thoracic and abdominal aorta with state of the art stenting, fenestrated grafts, hybrid and open surgery
- Conditions treated include traumatic and atherosclerotic dissections. Occlusive disease of aorta, visceral, renal arteries and peripheral arteries are also treated with open and endovascular therapy
- Venous abnormalities treated include varicose veins, venous ulcer, venous thrombosis and compression syndromes. Methods used include radiofrequency ablation, ultrasound guided sclerotherapy, embolisation venous stenting and open surgery

- The department provides vascular access procedures for dialysis and administration of drugs. The surgeons support the St Vincent's Public and Private Hospital renal transplant program and the neurosurgical service with spinal access
- Non-invasive diagnosis and monitoring is available on site by the St Vincent's Clinic Vascular Laboratory

The Department of Vascular Surgery is active in researching and introducing new techniques in treatment of all aspects of Vascular Surgery.

All members have conjoint teaching appointments at UNSW and University of Notre Dame.

# St Vincent's Clinic Research Foundation

## Dedicated to defeating tomorrow's illness and disease today

### Who we are

St Vincent's Clinic Research Foundation champion top-tier research projects across St Vincent's Sydney Health Innovation Precinct, enabling a unique and direct connection between research and patient care.

With a legacy that spans over 30 years, our grants are critical in advancing research projects in their infancy that require support to flourish. In turn, they enable researchers to establish a track record, allowing access to larger government and not-for-profit grants.

# 470+

grants awarded

# \$20m+

funding medical  
breakthroughs

# 30+

years of breaking  
boundaries

# A-Z

supporting uncharted  
research of all kinds

### Championing those who are unlocking medical breakthroughs

We believe that high-quality research underpins high-quality clinical care. Our grants support the talented doctors, nurses, and allied health professionals across St Vincent's Sydney Health Innovation Precinct who are developing new treatments and cures for diseases, including cardiovascular disease, cancers, diabetes, respiratory infection, neurological and mental illnesses and conditions that particularly affect Indigenous Australians.

Competition for grants is consistently strong. That's why our independent Scientific Committee, composed of leading specialists and academics from St Vincent's campus and major universities, rigorously evaluates all applications. We ensure only the best projects receive support.

# Open Support

## Compassion in Action

### Who we are

We are a Sydney-based charity committed to acting and caring for the most vulnerable members of our community. We were founded by the Sisters of Charity in 1990 and continue the commitment to putting "Compassion in Action". Our services continue to grow, with the strength and vision of the Sisters at the heart of everything we do.

### What we offer

Open Support is committed to providing unwavering support addressing some of the most profound and urgent needs in our communities that can impact any of us. We offer services to women and children escaping domestic and family abuse, people experiencing social isolation and loneliness and we provide access to health care for people living in regional NSW.

### Our programs

#### Domestic Abuse

Helping women and children move beyond crisis to empowerment and independence

At Open Support we offer a holistic package to address all aspects of trauma and healing. We have two crisis accommodation services that can support 12 families at a time when at capacity. These are a temporary home for up to three months, with clients then being supported by our outreach services and into private accommodation. Our team has specialist expertise to assist people who are on precarious visas or who are culturally and linguistically diverse. All referrals must be made via DVNSW Line: 1800 65 64 63

#### Social Isolation

Establishing meaningful social connections

The Community Connections Program offers opportunities for meaningful social connection free of charge, to individuals in the community who are experiencing isolation or loneliness, aiming to reduce isolation and increase wellbeing. Our service provides people with individualised case planning and social navigation, direct opportunities for connection through building social capacity and confidence. For referrals: [opensupport.org.au/our-programs/social-isolation/get-help/](https://opensupport.org.au/our-programs/social-isolation/get-help/)

#### Country Care Link

Improving access to healthcare for regional and rural patients

Our Country Care Link service aims to reduce barriers to healthcare for regional and rural people through the provision of free transport to and from medical appointments when they arrive in Sydney. We take the stress and hassle out of navigating the city for country people. To make an enquiry or booking, email: [transport@opensupport.org.au](mailto:transport@opensupport.org.au)

### How can you help

The support we provide relies on the generosity of the community, including you. By contributing to our work, you become an essential partner in creating change and fostering stronger communities.

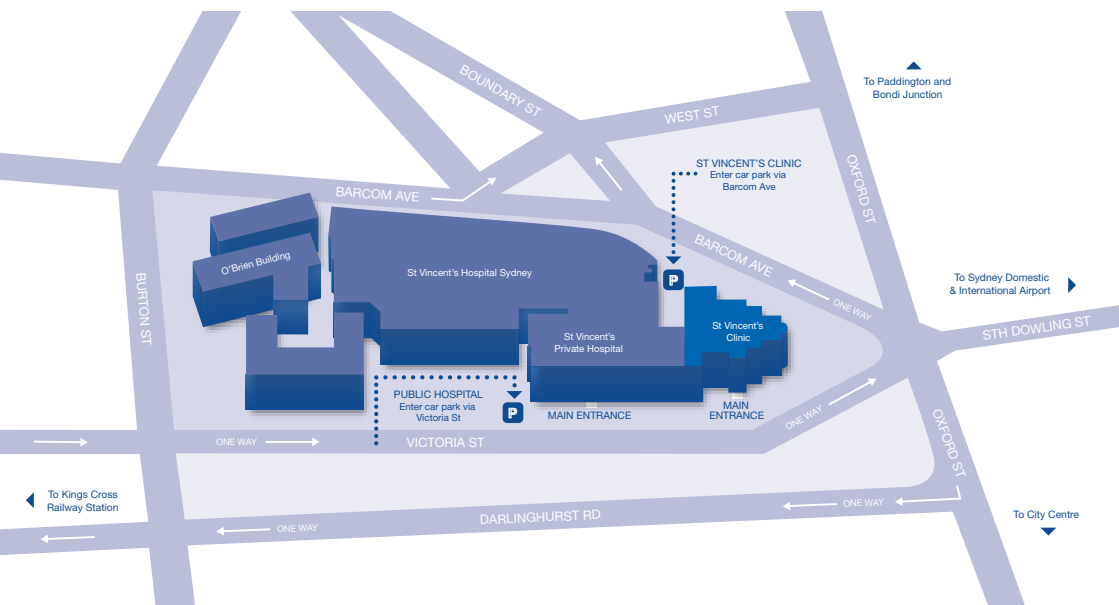

Together we can build a future where everyone feels valued and connected and has the opportunity to succeed. With a single or regular donation, you give our team the means to offer more people the gift of connection, support and hope for a brighter future.

# Where to Find Us

St Vincent's Clinic is located on the St Vincent's campus in Darlinghurst, adjacent to St Vincent's Private Hospital Sydney and St Vincent's Hospital Sydney. The Clinic complements other facilities on campus by providing an extension of diagnostic and treatment services including the St Vincent's Private Hospital Sydney Day Surgery Unit.
